INSTRUCTIONS FOR USE OF THE MEDICAL DEVICE DESTINATIONS

Solution for rinsing the ear canal A - CERUMEN , 2 ml drops What is earwax

What is earwax used for?

Earwax protects the ear from infections, dust and foreign objects. It helps regulate the number of microbes naturally present on the surface of the skin of the external auditory canal. Earwax is a lubricant for the eardrum, without which it would become hard, rigid and unable to transmit sound accurately.

Why is it important to maintain ear hygiene?

Basically, earwax is removed from the external auditory canal naturally by chewing movements of the jaw. When this process is disrupted, earwax accumulates. Thus, a cerumen plug is formed, which disrupts the normal functioning of the ear and can cause hearing loss, ringing in the ears, and dizziness. Using a mild ear hygiene solution helps keep the outer ear canal clean and prevents wax build-up.

What is A - CERUMEN ?

A - CERUMEN is a surfactant-based ear canal rinser. A - CERUMEN can be used in children over 6 months and in adults for:

- regular hygiene to remove earwax and prevent the formation of cerumen plugs;
- dissolving sulfur plugs.

How does A - CERUMEN work ?

A - CERUMEN moisturizes and then dissolves wax plugs (accumulation of compacted, dry earwax). After removing the wax plug, earwax can again perform its protective and moisturizing functions.

Release form

Solution in disposable dropper bottles of 2 ml. 2, 4, 5 or 10 disposable bottles per package. Disposable dropper bottles are simple and safe to use.

Compound

Surfactants (sodium lauryl sarcosinate , sucrose esters), humectant, vegetable dye, excipients.

Does not contain preservatives. Ingredients of natural origin.

Dosage

- For regular rinsing of the ear canal: apply 2 times a week.
- If you have ear plugs: apply for 3-4 days in the morning and evening.

Mode of application

1. Open the bottle and tilt your head to the side (the ear being treated is at the top)
2. Place half the bottle into your ear.
3. Wait 1 minute while massaging the base of your ear.
4. Tilt your head to the other side to remove excess product and earwax, then rinse* and wipe away excess.

*Rinse with saline solution or clean water.

Contraindications

Hypersensitivity to components.
Otitis, perforation of the eardrum, presence of a tube for ventilation of the middle ear.
Children under 6 months.

Storage conditions and periods, precautions

Store at temperatures between 10 °C and 40 °C. Do not freeze.
Shelf life - 3 years.
An open bottle must be used within 24 hours.
Do not use after the expiration date indicated on the bottle.

special instructions

Do not insert the tip of the bottle into the ear canal deeply to avoid mechanical damage and irritation.
Do not use the product if the bottle is damaged.
If your ear canal is painful, consult your doctor. Avoid contact with eyes. Do not swallow.

KEEP OUT OF THE REACH OF CHILDREN.
